

PETER SAMSON

WEB DEVELOPER

Web Development Experience

Web Development Experience · General Assembly Oct. 2017 to Jan. 2018

12 week, 60+ hours per week, full-stack web development program

Built 4 full-stack web applications

Implemented multiple front-end applications using JavaScript frameworks

Built authenticated APIs with Ruby on Rails, Node.js and MongoDB

Created and maintained software documentation

Developed strong programming fundamentals from hands on learning and real-world application

Boatyard

Built a boatyard management web app using Ember.js designed to allow users to store information about boats and work done on those boats.

Used Ember.js, AJAX and CSS for the front-end app and constructed a SQL database with Ruby on Rails.

Nozama

Built a mock e-commerce site with a group that allows users to build and submit orders in a cart. The user is charged and may view past orders from the database. Used Stripe, Javascript, CSS, Handlebars and JQuery to build the front-end. The back-end used Express.js to build a mongodb database.

Event Tracker

In three days, built a full-stack web app that allows users to create, update and delete their own events held in a back-end database. Used Javascript, CSS, AJAX, Handlebars and JQuery to build the front-end app. Used Ruby on Rails to build a SQL database. I have since built an alternate front end using ReactJS/

Tic-Tac-Toe

In three days, built the front-end of a web app that allowed users to play tic-tac-toe and records their wins and losses. Used Javascript, CSS, AJAX, and JQuery to build the app.

Additional Experience

Business Intelligence Advisors

Analyst

Boston, MA

Sept. 2016 to Aug. 2017

Performed behavioral analysis of earnings calls to detect deceptive behavior.

Intern
